

# BUDGET

## - checklist -

Budgets are tricky. There's a lot to think about. Save yourself the hassle with Fresher Bathrooms' handy checklist of the main things to account for, so you won't fall short.

### DESIGN

Whether undertaking works with a builder, or trying to manage a project yourself, a professional design is essential. It will assist you with knowing what you are going to get, and avoid many potential errors with contractors on site. If you have a flair for design and have your own ideas, get involved in this process, too!

\$

---

### DEMOLITION / RUBBISH

Asbestos at times may be present, and if so it is important to have this professionally tested and removed.

\$

---

### PLUMBING

Many properties will require a pressure limiting valve as to not void the tapware warranty.

\$

---

### ELECTRICAL

It's important this is always left to the professionals.

\$

---

### CARPENTRY

If moving walls, it's important to have a registered builder or engineer inspect and determine if any structural works are required.

\$

---

### PLASTERING

\$

---

### WATER PROOFING

Essential to the longevity of a bathroom renovation, and should always be carried out by a certified professional.

\$

---

### TILING

\$

---

### PAINTING

\$

---

### BATHROOM FITTINGS

\$

---

### TILES

\$

---

### SHOWER SCREEN / MIRROR
